

## HOW TO CUT COSTS, KEEP YOUR LINE MOVING AND GET CODING YOU CAN COUNT ON FOR ROUND THE CLOCK PRODUCTION

What is the easiest way to meet your 24/7 production line requirements? Linx coders have been specially designed to keep up with the most demanding production targets, cutting costs in the process and ensuring that coding meets the high standards that you and your customers require.

### CUT COSTS

Reduce costs from unnecessary downtime and missed production targets. Linx coders are designed to offer longer service intervals, with IP-rating available across our range to maintain uptime at lower cost.

### KEEP THE LINE MOVING

Linx coders feature an intuitive user interface to get your line set up quickly between product runs, minimising operator

### RELIABILITY

Built to withstand the pressure to perform 24/7, Linx coders are a robust option for any high volume production line. Our range includes coders to suit wet, dusty or clinical production environments so you can be sure your coder is fit for purpose.
